Conformation

Judge Laurale Stern

I would first like to thank the Border Terrier Club of America for the invitation to judge this specialty and its members for having the confidence in offering this opportunity to me. It has been my pleasure and a great honor.

I'd like to especially thank Joann Romero and her committee for making this experience so relaxing and enjoyable for me. I'd also like to thank D'Arcy Downs-Vollbracht and Bailey Bremner for their excellent stewarding. They were so good at keeping everyone organized, double checking my results and encouraging me to take periodic breaks. If you have never stewarded before, it is a stressful and difficult job and one of the most important at a specialty. A good steward, especially in an entry as large as this, is worth gold!

Before I give you some brief comments on the entry over the past two days, I would like to make a couple of observations of the border terrier over the many years that I have been smitten by the breed. John and I joined the BTCA in 1981 after we purchased our first border terrier, Chauncey. We have attended many specialties over these 37 years and have seen huge changes in the breed, most of which are positive.

1. When we joined, the breed had a great deal of variation in type. It was actually difficult to define a type at that time, since there were short, cobbie types, long, lean types, smushed in faces, long narrow muzzles, etc. It is all part of developing a breed.
2. Sound movement was a huge problem. There were many dogs that looked great posed on a table, but when they began to move, really fell apart. It was difficult to find good front and rear angulation. Cow-hocked rears and crossing over fronts were common, which of course affected sound movement.
3. Heads had huge variation and over the years suffered some trends that affected bites and type.

Fortunately, the club has benefitted from very dedicated breeders and members who really worked to keep the type and function correct by educating newcomers, offering breeder education on a continual basis and emphasizing the working aspect of the breed. There are few breed clubs that require a working test at every specialty and reward working titles over all others. I so admire this about the border terrier club and enthusiasts.

Okay…on to the past two days…

I would first like to say that this was an absolutely awesome entry of border terriers. Most of the dogs were very well conditioned and presented both days. My decisions were NOT easy. I was pleased to see with only a few exceptions correct scissor bites with large teeth and full jaws. This was a nice surprise since large teeth have been a problem over the past several years. There were a number of dogs with large teeth but narrow jaws. As breeders we need to keep in mind that large teeth, along with full muzzles and strong jaws are necessary to protect our dogs from injury should they come face to face with vermin. Yes, the border terrier is primarily a bolting breed, BUT not all animals encountered will bolt and may turn on the dog.

Overall the front and rear movement has improved over the 37 years that I have been involved with the breed. I don't believe that I saw more than one or two cow-hocked or wide rears.

Breeding sound front movement with good, efficient reach is very difficult and can take many more generations than correcting rear movement. As breeders if your bitches have weak, ineffective front movement, look for mates who have strong fronts with good reach. Carefully select puppies with those nice fronts for your breeding stock.

I also saw a fair number of dogs who side-winded or crabbed while moving. This reflects an imbalance in movement, usually indicating a stronger rear than front. Again, watch those fronts.

By far the greatest concern that I have after judging this entry was the lack of good, thick hides. I found a larger number in the specials class, but many fewer in the class dogs, who are our future specials and sires and dams.

I'll end with two big positives. The first is that with the exception of maybe three or four dogs, I could span every dog. Those that I couldn't were often due to being overweight. The second was that temperaments were excellent. I didn't see so much as a threatening eye from even one dog while examining them. Kudos to all of you breeders!!

I have a couple of suggestions for future specialty committees.

1. The on-deck ring made organizing the upcoming class easy and kept the dogs and handlers from gathering in the aisles causing congestion. It made judging more organized and efficient.
2. PLEASE save seats for the judge and spouse, if there is one, for the Awards Dinner. Because I had to stay for photographs and return to our room to freshen up for the evening, we arrived when the cocktail hour was over and dinner had begun to be served. There were no seats available together for my husband and me. Fortunately someone offered us two seats at their table. A bit later, more tables were added since there were others who came later and also couldn't find seats.

Thank you again for nominating me to judge this wonderful specialty and for entering your dogs under me. It was such a pleasure to see such beautiful, well-conditioned, correct border terriers. I enjoyed every minute of the two days of judging.

Sincerely,

Laurale Stern,
2018 BTCA National Specialty Conformation Judge

Puppy Dogs 6 Mos & Under 9 Mos
